WE cannot see why the anti-prohi bitionists in some of the large Kansas cities are so strenuous in their efforts to oppose the enforcement of the liquor law. Those who are posted in such movements as the temperance cause must know that the more the temperance people are fought the more determined they become. They have the law and the best of the argument on their side, and clad in such a panoply, and firm in so just a cause, what can be the result but victory on every field ultimately. If the liquor law is a good and practicable one, it will prevail and be upheld even against the most pow- farmers declared their purpose of sow erful opposition. There is one field upon which the prohibitionists and the anti-prohibitionists can fight under a common banner, and that is for the enforcement of the law! That is-for such a thorough test as will prove whether it is a sound, living statute or wouldty. It is for the interests of both parties to seek an immediate, thorough test. It will come to that eventually. If the law will not then stand the pressure, let it go down as it should

THE election of Miller and Laphani In New York, to succeed Conkling and Platt, will undoubtedly do much to unify and solidify the Republican party in the "Imperial State." Lap-Lam was known as a stalwart and Miller as a half-breed, and a concession has thus been made to the two great factions which have been contending so bitterly for the mastery. We do not believe there is bardly a Republican (no matter what may have been his opinion of Conkling's actions during the past few months) who does not in a measure regret that circumstances have so shaped themselves as to require the great Senator's retiracy for the esent at least from an active participation in American politics. But it mems to have been a necessity that he abould retire to prevent the disruption of the party in New York. We believe that the party will now be united and that bemafter we can count New York as a Republican State. We further be-
